CHAPTER 3:

Tools of type Business Objects

Demo 1. Payables invoices

Introduction/Goal

Create “Workflow” that uses business objects.

Preparatory steps

User with proper roles to query payables and receivables invoices with REST API.

Search for the data needed.

We are going to play with the REST for Payables Invoices.

```
/fscmRestApi/resources/11.13.18.05/invoices?q=InvoiceNumber='{InvoiceNumber}'&expand=all
```

Access AI Agent Studio, from SaaS->Menu->Tools->AI Agent Studio.

Steps followed

Step 1

- Navigate as shown

Figure 3-1. Opening AI Agent Studio from the Tools menu

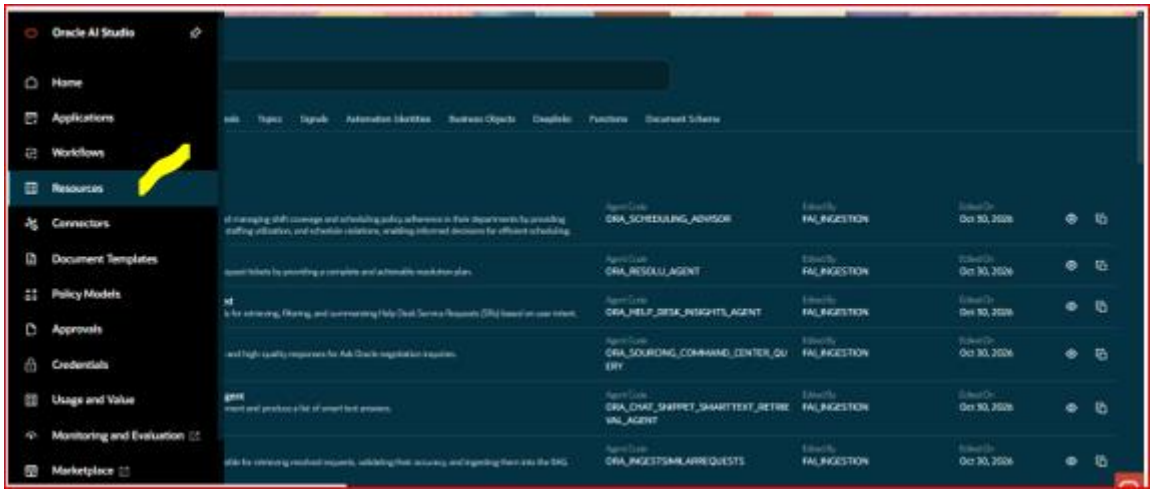

Figure 3-2. The AI Agent Studio menu

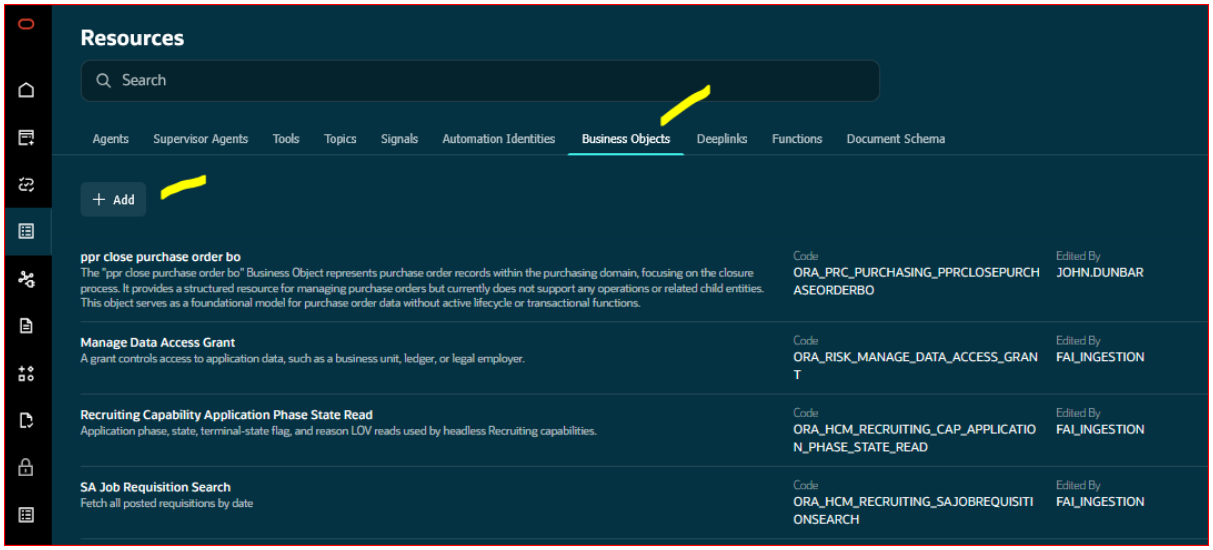

Figure 3-3. Adding a business object in Resources

- Create the Business Object for payables.

Name: AA_BO_AP_INV_01.

Description: Payables invoices.

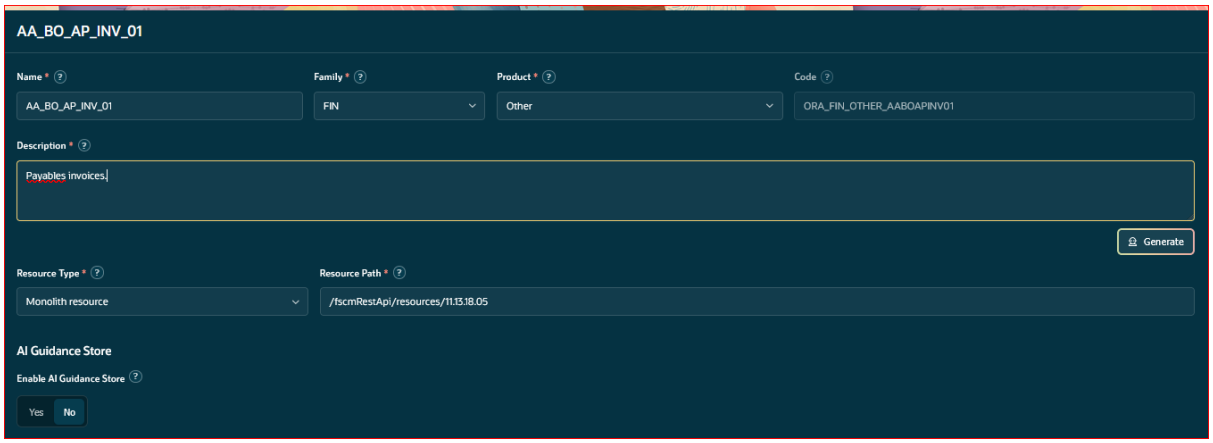

Figure 3-4. Defining the AA_BO_AP_INV_01 business object

Press “Add from specification” and select GET ALL.

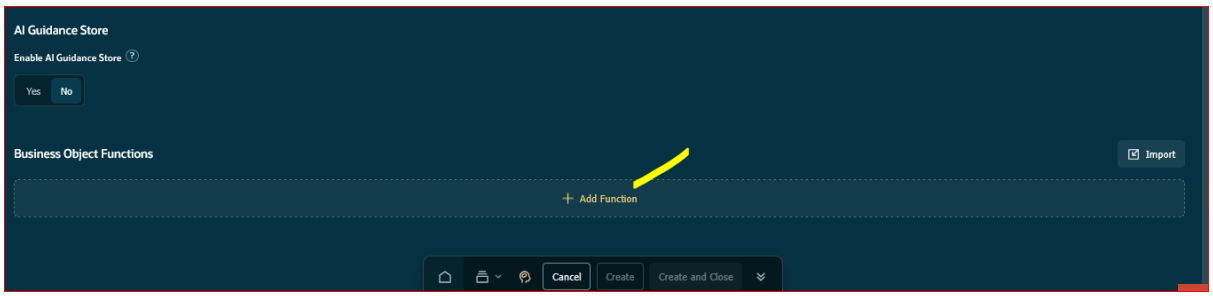

Figure 3-5. Adding a function to the business object

Name: getall_invoices.

After editing, paste this in the field “Resource Path”:

```
/fscmRestApi/resources/11.13.18.05/invoices?q=InvoiceNumber='{InvoiceNumber}'&expand=all
```

And click “Done” button.

We have to fix these issues.

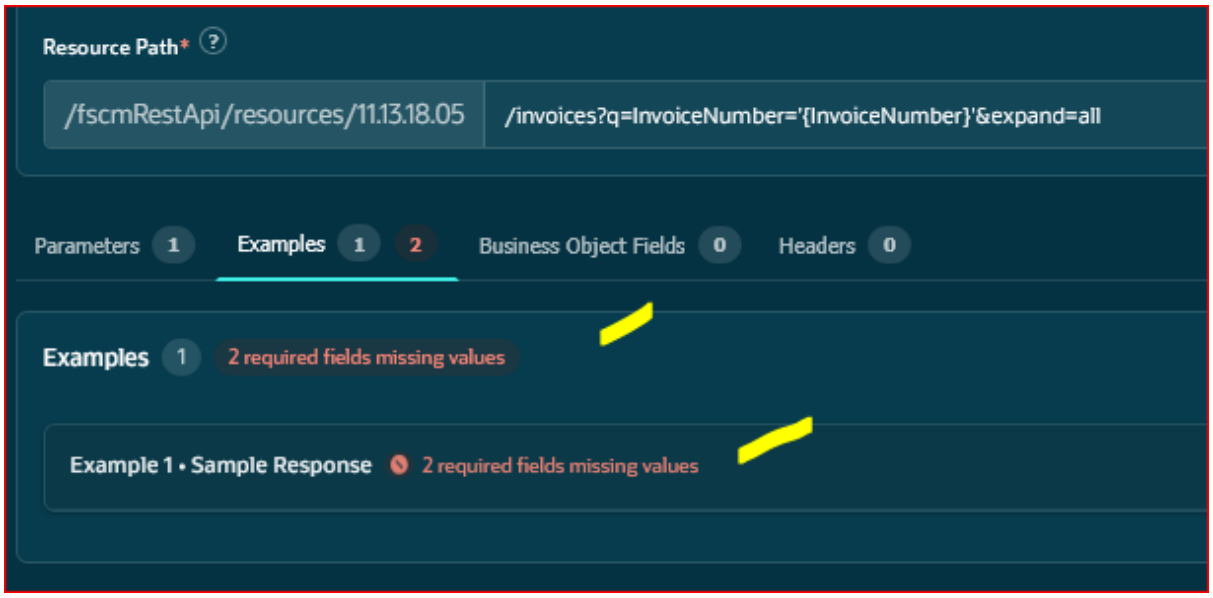

Figure 3-9. Examples with missing values to fix

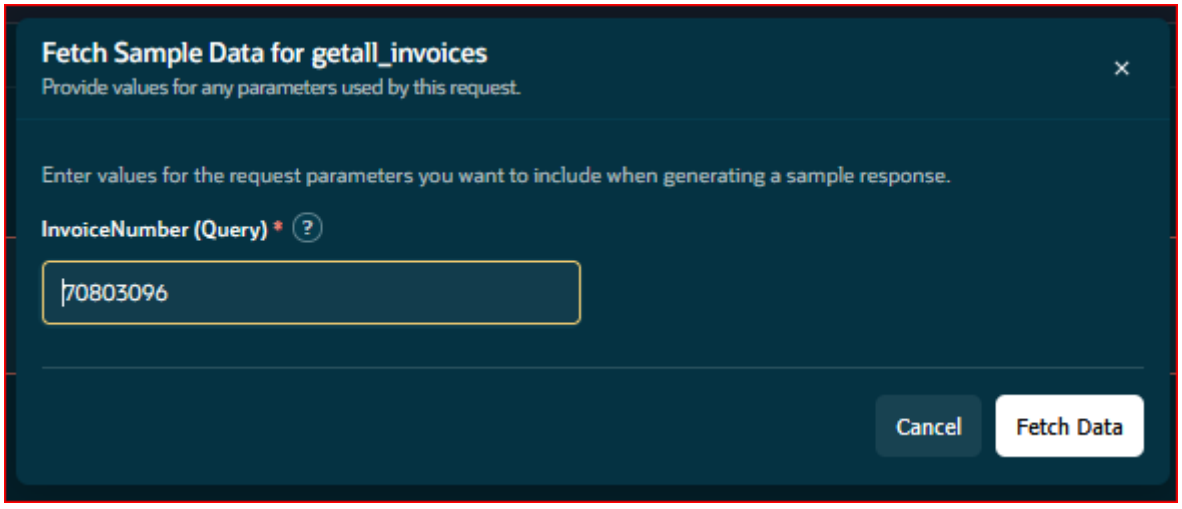

Figure 3-10. Fetching sample data for an invoice

© 2027 AI Agent Studio for Oracle Fusion Cookbook

I will search an invoice in SaaS for our exercise.

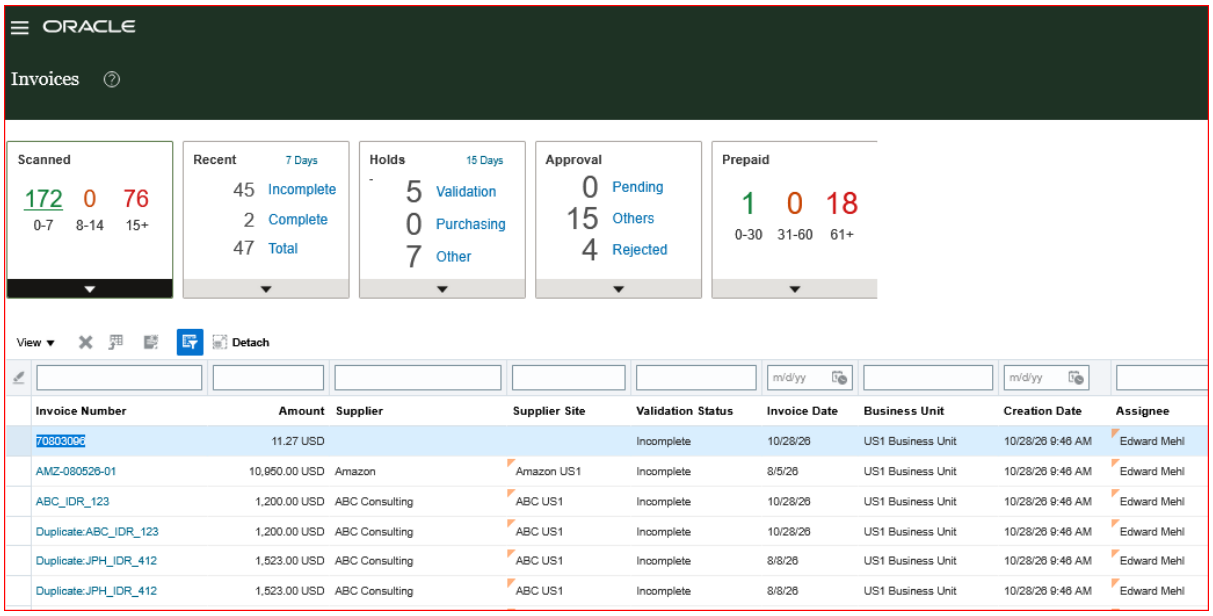

Figure 3-11. Finding a test invoice in Payables

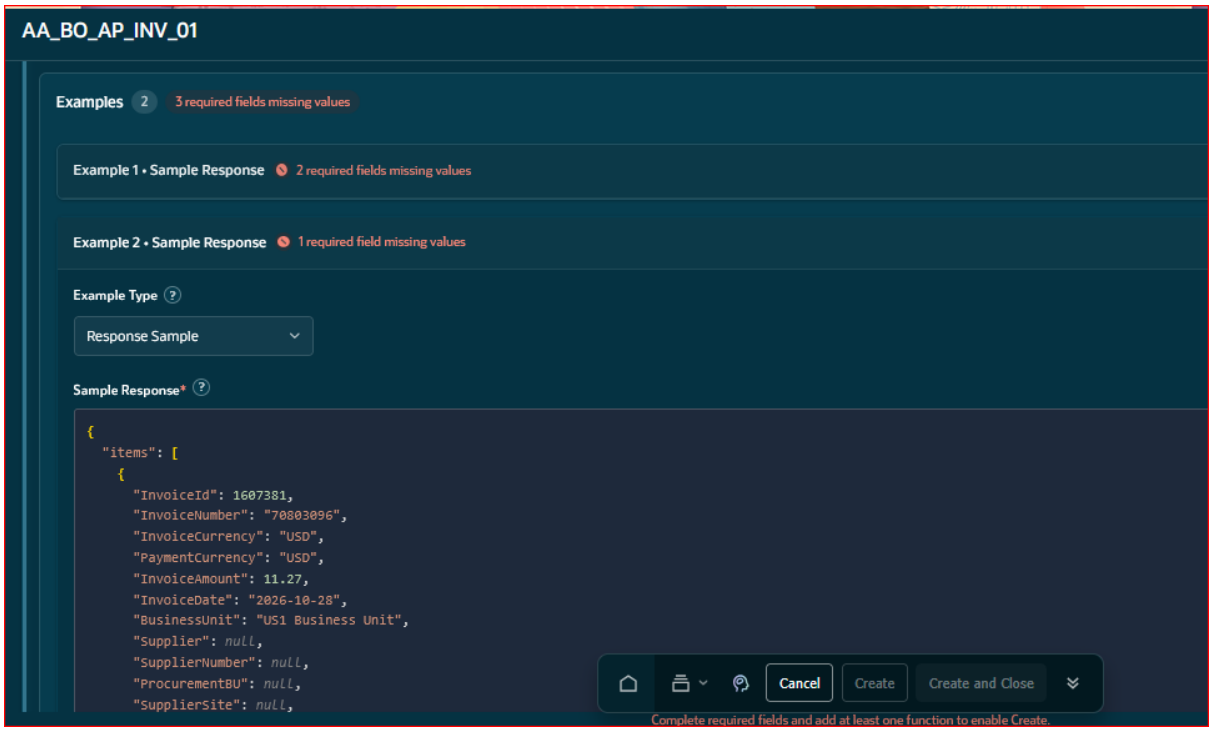

Figure 3-12. The generated sample response

Enter example in JSON format.

© 2027 AI Agent Studio for Oracle Fusion Cookbook

```
{
“InvoiceNumber” : “70803096”
}
```

Now click “Create” button. Here we are.

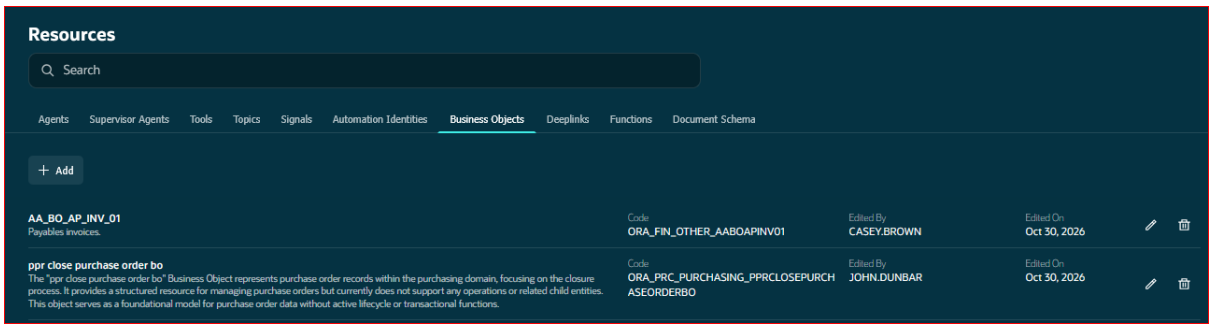

Figure 3-13. The new business object in the list

Our Business Object for Payables invoices is ready for use in AI Tool.
Notice this artifact in this version cannot be exported.

Step 2

- Create the Tool of type Business Object.

Navigate to proper “Tools” tab, as shown.

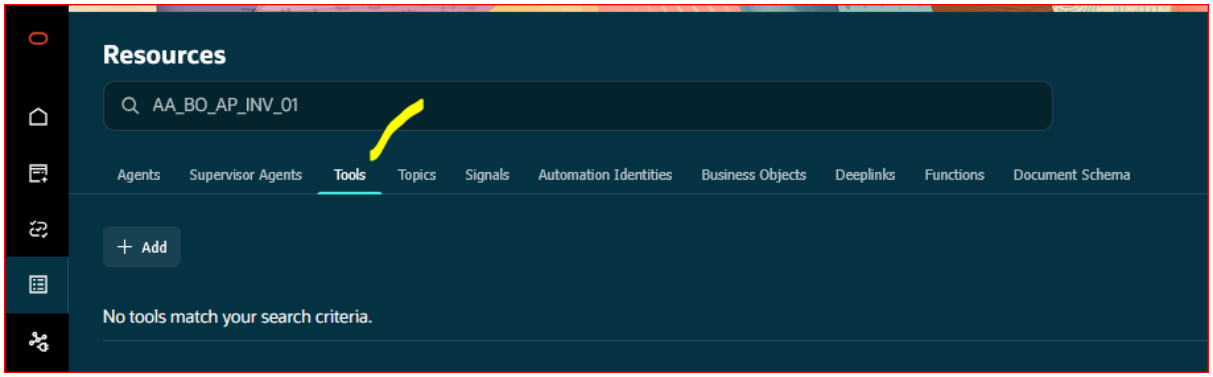

Figure 3-14. Adding a tool from the Tools tab

Name: AA_DEMO_TOOL_AP_INV.

Description: Payables Invoice. Indeed we will generate with button.

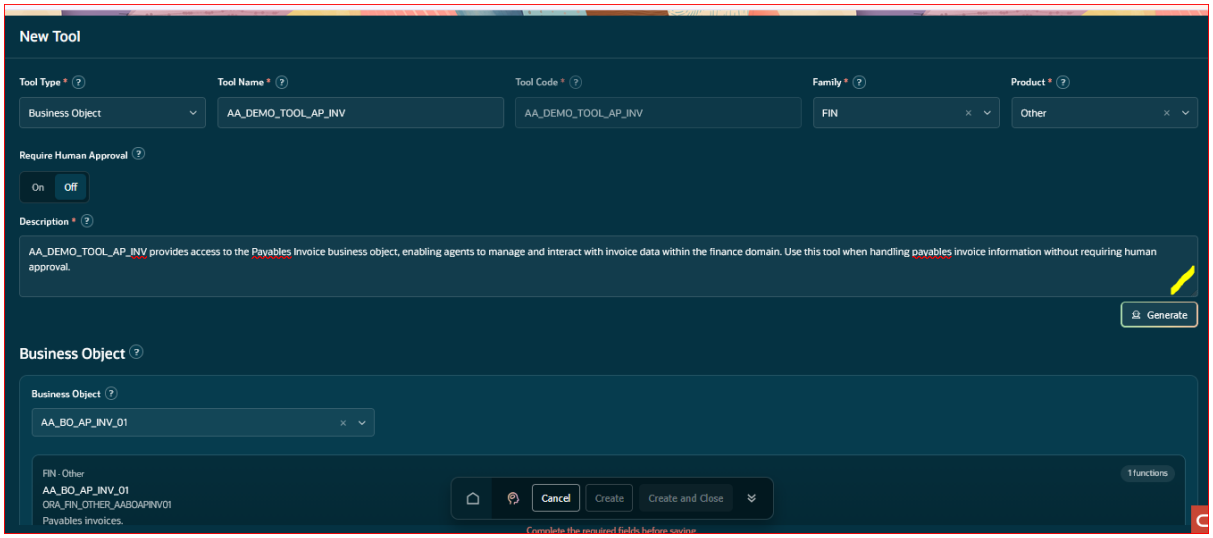

Figure 3-15. Creating the AA_DEMO_TOOL_AP_INV tool

The generate button will help us with the descriptions.

Search using filters.

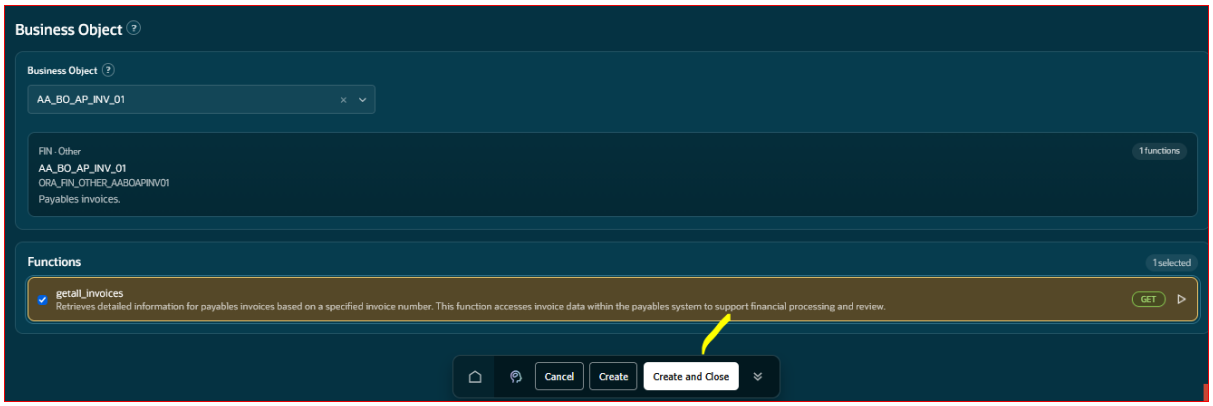

Figure 3-16. Selecting the getall_invoices function

Click on Create and Close button.

We are here.

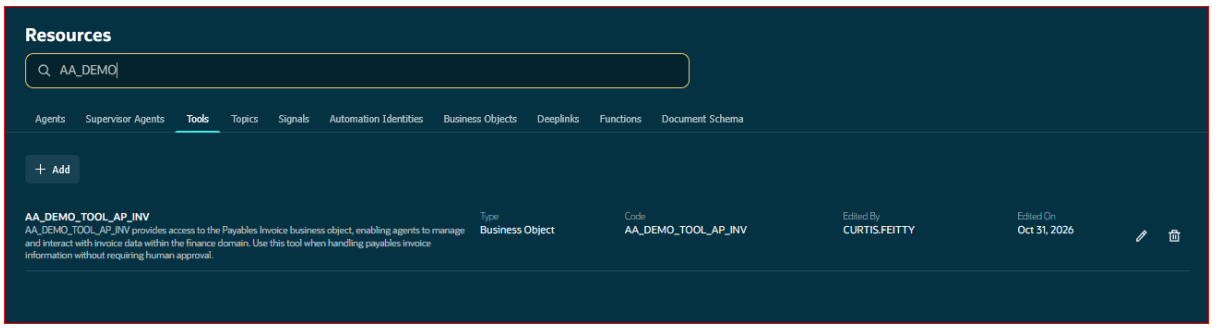

Figure 3-17. The new tool in the Tools list

Step 3

- Create the Agent.

Navigate to below tab “Agent”.

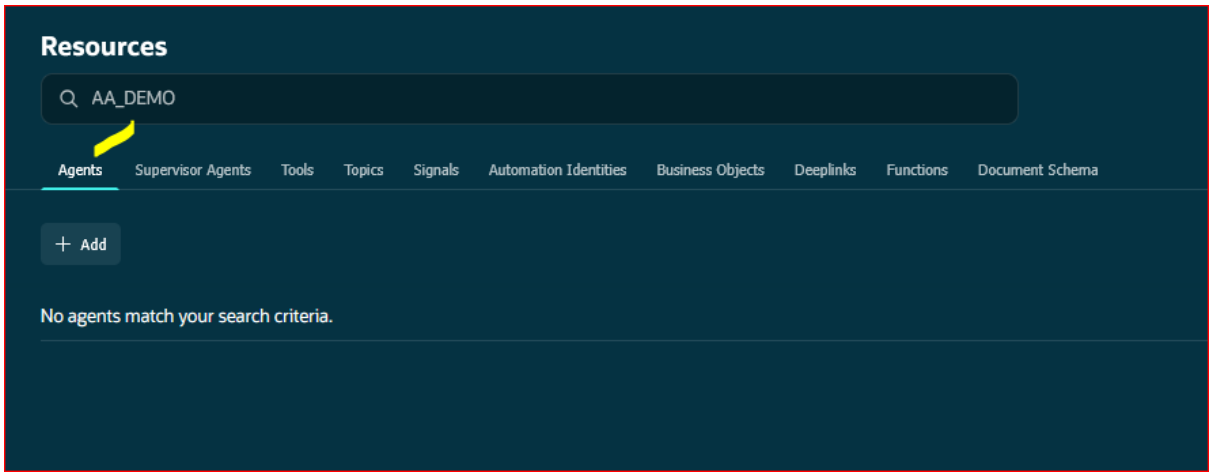

Figure 3-18. Adding an agent from the Agents tab

Name: AA_AGENT_AP_INV.

Description: Payables invoice.

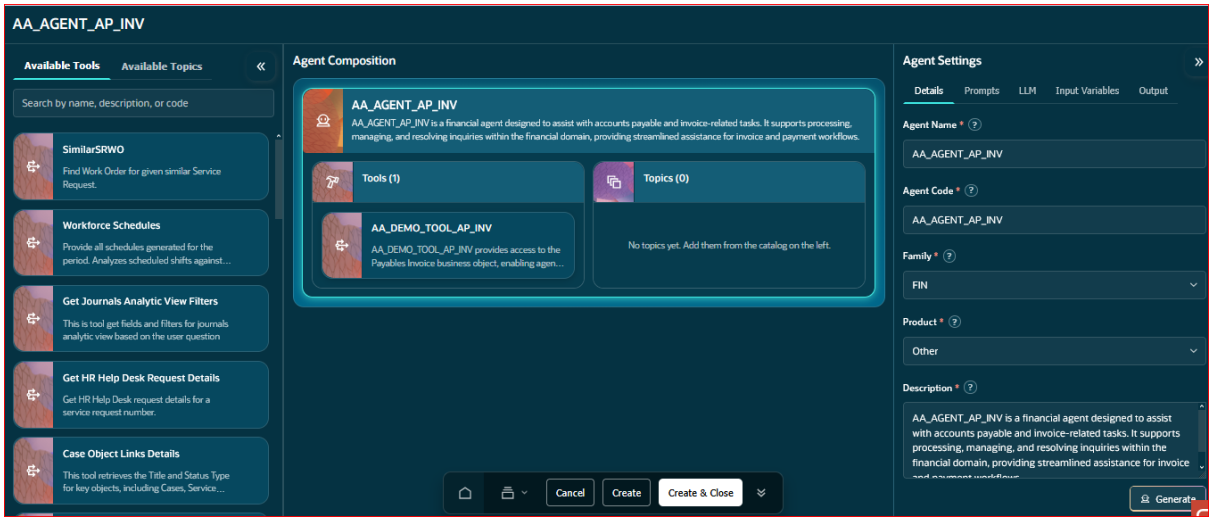

Figure 3-19. Defining the AA_AGENT_AP_INV agent

For now default values for this area:

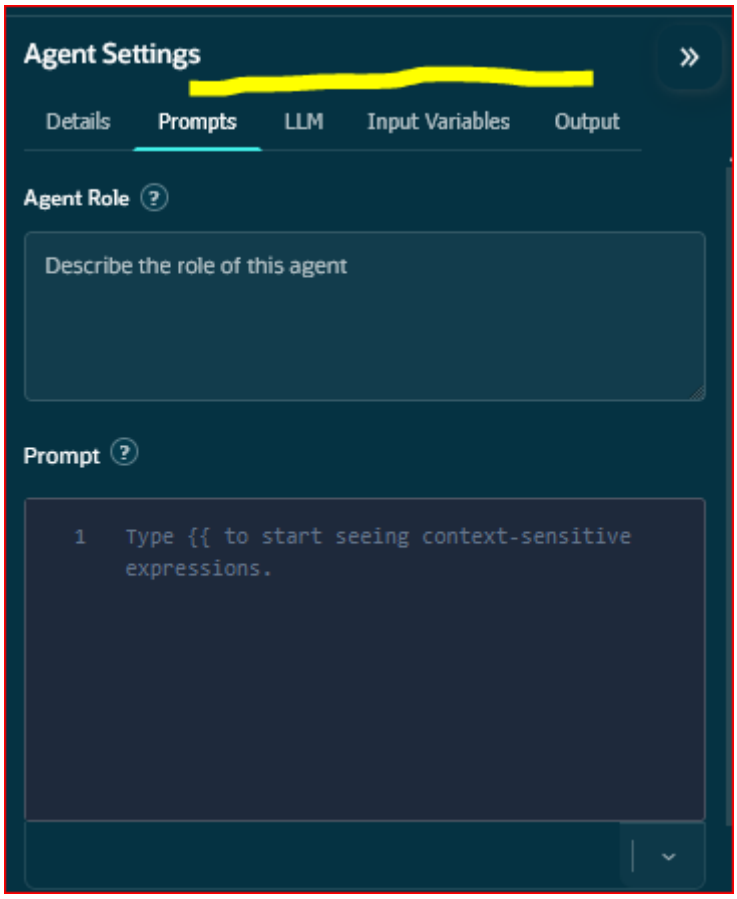

Figure 3-20. Agent role and prompt

Make sure your user has the proper roles.

© 2027 AI Agent Studio for Oracle Fusion Cookbook

Now, you can drag and drop your tool to your new agent.

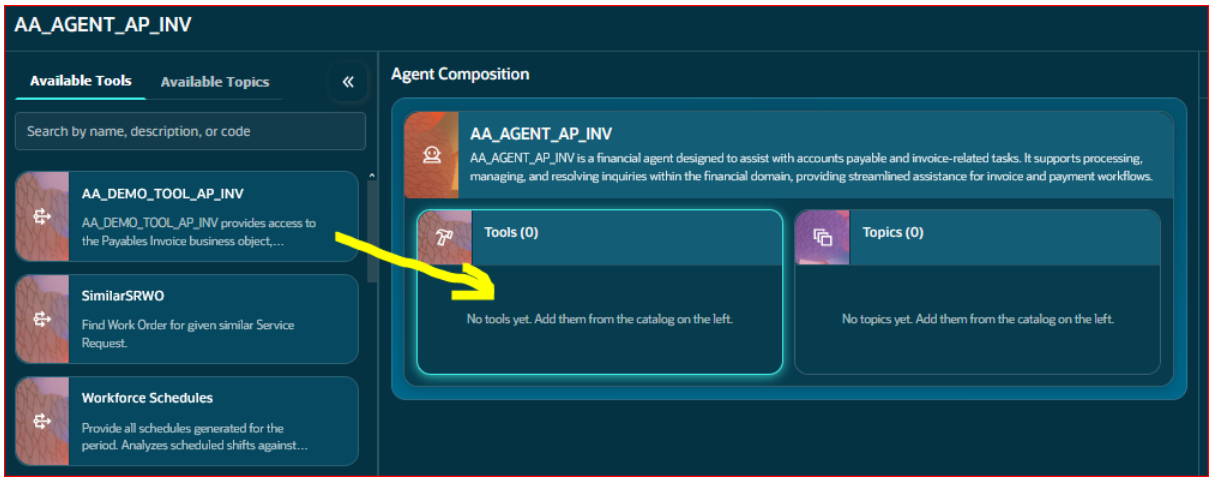

Figure 3-21. Dragging the tool into the agent

© 2027 AI Agent Studio for Oracle Fusion Cookbook

Click on Create after filling in the data.

Select “Tools” on the right and use the filter of the left.

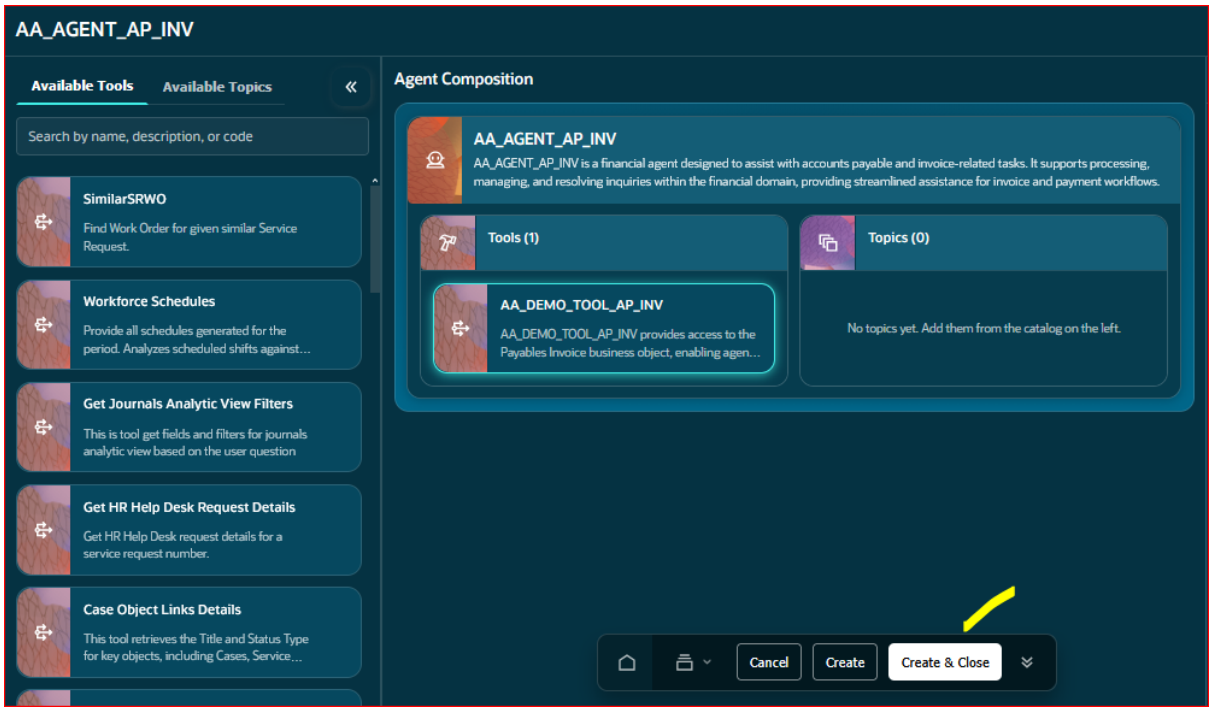

Figure 3-22. The agent with its business object tool

© 2027 AI Agent Studio for Oracle Fusion Cookbook

Click on (+) Plus.

Then click on “Add” button.

© 2027 AI Agent Studio for Oracle Fusion Cookbook

Then “Save and Close”. Now we can filter.

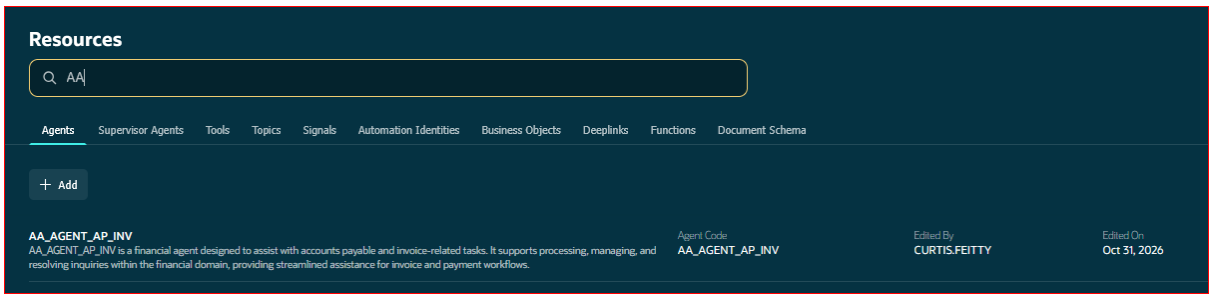

Figure 3-23. The new agent in the Agents list

This is a difference from 26C- releases, we need a workflow to test and run.
